BCS Snow Clearing Equipment

A MACHINE FOR ALL SEASONS...

...NOT JUST FOR CHRISTMAS!

With up to 25 attachments available a BCS Snow Clearing Machine offers unbeatable value for money and can be used all year round to cut grass, rotavate, and much, much more!

If you have areas that have to remain accessible when it snows, then we have the solution. BCS Snow Clearing Equipment will allow you to keep things moving when it snows; **car parks, footpaths, access roads, sports pitches** - in fact **anywhere!**

There are up to 25 different attachments available, so whilst they are **fantastic for clearing snow**, they can also be used all year round, giving you **great value for money** and **incredible versatility**.

Each of the four power units will operate any of the three snow clearing implements.

THE 600 SERIES MACHINES WILL ALSO OPERATE A RANGE OF GRASS CUTTING ATTACHMENTS.

BCS 615L

This entry level machine is compact and easy to use and will clear up to 2,500m² per hour.

BCS 630

Our most popular power unit for snow clearing implements, the 630 will clear up to 4,000m² per hour.

THE 700 UNITS WILL OPERATE ROTAVATORS, PLOUGHS, AND GRASS CUTTING ATTACHMENTS.

BCS 720

Not just great at clearing snow, the 720 is also a fantastic rotavator and will clear up to 2,500m² per hour.

BCS 740

Our most powerful machine, the 740 can operate over 25 attachments and will clear up to 4,000m² per hour.

TRACMASTER TIPS

"It is always best to clear the snow as quickly as possible following snowfall, before it has a chance to freeze and compact."

"If snowfall in the area is not known for being heavy then the Snow Brush attachment would be our first choice."

SNOW PLOUGH

The Snow Plough is the fastest way of clearing snow. The curved blade efficiently rolls snow up and away from the blade and off to either side.

- > 100cm working width
- > Clears snow up to 30cm deep
- > Runs on skids which are easily adjusted for working height
- > Blade can be angled to the left or right
- > Adjustable angle to deal with deep snow
- > Floats to follow the contours of the ground
- > Replaceable metal cutting bit for bottom of blade
- > Optional soft blade kit for bottom of blade
- > Optional castor wheels

SNOW BLOWER

The Snow Blower is the best implement for clearing deep snow. It easily outperforms two-stage snow blowers, in fact it's more like a snow cannon!

- > 60cm or 70cm working width
- > Clears all types of snow including frozen or wet up to 40cm deep
- > Augers rotate at 1200rpm to break up snow and propel it up to 16m away
- > Angle of stainless steel discharge chute can be easily adjusted from left to right from operator position
- > Easily adjustable flap on the top of the chute determines the height of the discharged snow
- > Adjustable skids for easy height selection
- > Suitable for use on most surfaces, even gravel paths and driveways

SNOW BRUSH

The Snow Brush is the best implement for clearing a surface following a light snowfall.

- > 80cm or 100cm working width
- > Clears snow up to 10cm deep
- > Easily adjustable to the left or right
- > Runs on castor wheels for easy height selection
- > Heavy-duty nylon bristles
- > Brush is made of sections which can be replaced individually
- > Can also be used for sweeping moss, leaves and mud from many areas including car parks, yards, block paving and astro turf
